

Aniket Ojha

Software Developer | AI/ML Engineer | Test Automation Engineer
+91-6305341430 • aniketojha2805@gmail.com • [linkedin](#) • [github](#) • Hyderabad, India

Professional Summary

Motivated Computer Science Engineering student specializing in Artificial Intelligence with strong skills. Proven ability to build AI-driven applications and solve complex problems through hands-on projects and competitive programming. Seeking opportunities to contribute to innovative software products while continuously learning and growing.

Education

B.Tech in Computer Science Engineering (AI Specialization)

2023 – Present

KL University, Hyderabad, Telangana

Technical Skills

Programming & Core CS: Python, Java, C, Data Structures & Algorithms (DSA), DBMS, Operating Systems, Computer Networks, OOP

Backend & APIs: FastAPI, REST APIs

Frontend Development: HTML, CSS, JavaScript, Streamlit

Cloud & DevOps: Docker, Kubernetes, Git, GitHub, CI/CD Pipelines

Databases: MongoDB, SQL

AI/ML & Data Science: Machine Learning, Neural Networks, NLP, Computer Vision, RAG, FAISS, LLaMA, YOLOv8, OpenCV, Scikit-Learn

Work History

DocSage – Document Assistant | Python, FastAPI, FAISS, LLaMA 3.3, RAG

2024 – Present

- Architected and deployed an document assistant using RAG with FAISS vector search and Groq LLaMA 3.3, reducing document query time by 60% and delivering precise, cited answers from PDF, DOCX, and TXT files.
- Built RESTful API endpoints with FastAPI and a Streamlit UI supporting multi-turn conversation memory, improving context-aware dialogue and session continuity by 40%.

Fake News Detector – NLP Classification Web App | Python, JavaScript, NLP, Scikit-learn

2024

- Developed a web application classifying news articles as real or fake using NLP techniques — TF-IDF, tokenization, and stop-word removal — achieving 87% classification accuracy on test datasets.
- Engineered a dynamic JavaScript front-end rendering real-time prediction results with confidence indicators, reducing average user decision time by 35%.

Accident Prediction System – Computer Vision | Python, YOLOv8, OpenCV

2023 – 2024

- Built a real-time accident prediction system using YOLOv8 and OpenCV to detect vehicles and monitor road scenarios at 25+ FPS via GPU-accelerated model inference.
- Implemented a Time-To-Collision (TTC) algorithm estimating collision probability from object distance and motion vectors, achieving 92% detection accuracy and enabling proactive safety alerts.

Core Projects

MyDocReader [GitHub Link](#)

- Built a client-side RAG document assistant running entirely in the browser using Next.js 15, TypeScript, and Tailwind CSS.
- Allowed users to upload PDFs, Word docs, or text files and ask questions about the content directly.
- Used local vector embeddings (Transformers.js, IndexedDB) to find relevant text and generated answers backed by direct citations via OpenRouter and Groq.

NewsVerify [GitHub Link](#)

- Created a real-time news verification tool using React and FastAPI with a hybrid search approach (FAISS vector search combined with SQLite).
- Cross-checked claims against a local knowledge base of over 1,000 verified events to calculate a confidence score (using scikit-learn).
- Added a fallback to DuckDuckGo web search and an LLM (via OpenRouter) to handle newer or unverified events.

My-Portfolio [GitHub Link](#)

- Built a personal portfolio website using React and Tailwind CSS to display projects, skills, and coding profiles.
- Set up a responsive frontend for a clean look on both mobile and desktop, and hosted the site on Vercel for reliable access.

Certifications

- Ethical Hacker (CEH) — by EC-Council
- MongoDB Associate Developer — by MongoDB University
- Advanced Automation Professional — by Automation Anywhere
- AI & LLM Specializations (Prompt Engineering, RAG Agents, Agentic AI) — NVIDIA Deep Learning Institute
- Technology Job Simulation — Deloitte
- AI for Business (AI 101 Fundamentals) — Udemey

Achievements

- LeetCode Knight — Top 2.15% globally, Rating 2000+; solved 100+ problems in Data Structures, Algorithms, and Dynamic Programming.
- Participated in 35+ competitive programming contests on CodeChef (Rating: 1263), consistently strengthening algorithmic problem-solving under timed conditions.
